

**CASE STUDY: AIRCRAFT WING TRAILER**

**LOCATION:** UK

**MARKET:** AEROSPACE

**REQUIREMENT:** Transporting expensive aircraft wings, the trailers required an extremely tough but decorative high gloss finish in addition to possessing excellent resistance to aviation fuel, however the customer was concerned that the external appearance was not marred by corrosion leaking out of unprotected box sections. As a result CCI Powder was blown into all box sections to ensure the continued anti-corrosion protection of all internal surfaces.

**PREPARATION** No preparation was carried out.

**TREATMENT:** The box section was treated with Corroless CCI Powder at 525 g/m<sup>3</sup>

**COMMENTS:** Minimum protection 4 years.
